

Torch energy limited Bosnia and Herzegovina

Overview

Electric power generation is a key sector of economic activity in BiH. Electric power is primarily generated in coal-fired thermal and large-scale hydro power plants and the country is a net exporter of electrical energy. The generating capacity is about 17,000 GWh. BiH historically had a comparative advantage in electricity.

BiH's electrical grid has suffered from decades of neglected maintenance and a lack of investment. The European Bank for Reconstruction and Development (EBRD) has provided a corporate.

The total available biomass related to the agricultural sector in Bosnia and Herzegovina has a total energy potential of 9422×10^{15} J. Out of

that, 8876×10^{15} J is from crop residues, 0.508×10^{15} J is energy from biogas obtained from livestock waste and 0.038 PJ is from oil crop residues.

Bosnia and Herzegovina

Bosnia and Herzegovina adopted a National Environmental Action Plan, which provides action path to address the major environmental issues of the country. In the energy sector the target will be achieved by increasing energy efficiency and usage of renewable electricity trade between countries is relatively limited as it is more technically

The energy sector in Bosnia and Herzegovina

Bosnia and Herzegovina could do a lot more to use energy efficiently. Electricity prices are kept artificially low and there is therefore limited incentive to make savings. The country is almost four times as energy-intensive as the average in EU countries and has the highest energy intensity in the Western Balkans.
