This paper discusses and analyses the productivity of solar home systems in isolated areas in French Guiana, a region characterized by specific human and environmental conditions. Its aim is a better understanding of the attitudes, expectations, and relationship of ...

ENERGY PROFILE French Guiana

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Solar resource maps & GIS data for 200+ countries , Solargis

The largest collection of free solar radiation maps. Download maps of GHI, DNI, and PV output power potential for various countries, continents and regions.

France releases renewable energy plan for French Guiana, solar ...

According to official statistics from the MEEM, French Guiana had 34 MW of PV capacity without

storage solutions (including stand-alone systems) and 5 MW of installed power consisting of
