Overview

It is the largest supply of emergency crude oil in the world. We provided design services as well as supervision of construction and filling on a fast track for the original SPR facilities. The U.S. Strategic Petroleum Reserve (SPR) was established in the mid-70s as a national priority to reduce America's vulnerability to an oil embargo, and we played a key role in its development. The SPR has a capacity of more than 700 million barrels, and is located primarily in huge underground. The Energy Information Administration's (EIA) Crude Oil Inventories measures the weekly change in the number of barrels of commercial crude oil held by US firms. The level of inventories influences the price of petroleum products, which can have an impact on inflation. If the increase in crude.
