### Uruguay's Top 10 Exports

The electricity sector of Uruguay has traditionally been based on domestic hydropower along with thermal power plants, and reliant on imports from Argentina and Brazil at times of peak demand. Over the last 10 years, investments in renewable energy sources such as wind power and solar power allowed the country to cover in early 2016 94.5% of its electricity needs with renewable energy

### Uruguay Power Generation and Environmental Technologies

Uruguay has made significant strides in power generation and environmental technology, establishing itself as a leader in renewable energy within Latin America. The country's strategic focus on sustainability has led to significant investments in wind, solar, and biomass energy, positioning it as a global model for renewable energy adoption.

### Energy profile: Uruguay

Uruguay's rate of electricity generation from renewables (98%) is among the highest in the world, with wind and hydropower leading the way. Wind power growth has been especially strong in recent years, with wind-generated electricity surpassing hydro in 2020 for the first time in Uruguay's history.

### Uruguay's Top 10 Exports

In macroeconomic terms, Uruguay's total exported goods represent 9% of its overall Gross Domestic Product for 2023 (\$101.6 billion valued in Purchasing Power Parity US dollars). That 9% for exports to overall GDP in PPP for 2023 compares to 11.6% one year earlier in 2022.

### **Biomass fuels Uruguay's green energy revolution , UPM Pulp**

A combination of hydroelectricity, wind, solar, photovoltaic and biomass, among others, has helped to power Uruguay's rapidly diversifying energy grid since then. According to UTE, the state-owned electricity provider, 96 percent of all energy generated in Uruguay comes from renewable sources.

### **Uruguay Power Generation and Environmental Technologies**

Uruguay has made significant strides in power generation and environmental technology, establishing itself as a leader in renewable energy within Latin America. The ...

### **Uruguay**

According to 2022 data from MIEM, Uruguay generated 14,759 GWh of electricity, 13,343 GWh for internal demand and exported 1,416 GWh to Brazil and Argentina. Typically, Uruguay generates a surplus of electricity due to an excess of wind-power capacity.

## Uruguay: Energy Country Profile

Uruguay: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

## Uruguay's Transition to Renewable Electricity

Uruguay, one of South America's smallest countries, is attracting outsized attention over its transition to green electricity. It didn't happen simply by building a bunch of wind and solar farms, the architect of the strategy said, but by rethinking the entire energy system.
