VoltStorage : Clean Energy Day and Night

VoltStorage GmbH (VoltStorage) is pioneering the field of redox flow storage technology as it strives to provide the ultimate usability of renewable energy with forward-thinking solutions. To further its objective, the company's technologies and applications are significantly contributing to a sustainable future.

Clean Energy

Making 100% renewable energy available day and night, for a fairer and cleaner world - that's the big challenge of our time. With the Iron Salt Battery, we at VoltStorage are developing an innovative and groundbreaking technology and solution for this.

VoltStorage GmbH

VoltStorage's success story began in 2016 as a Munich-based start-up. In our technology and product development, we focus on the non-critical raw materials iron and salt. We are using

them to deve

VoltStorage Company Overview, Contact Details & Competitors

VoltStorage GmbH launches 50 kWh vanadium redox flow battery. Germany battery manufacturer VoltStorage has unveiled a containerised 50 kWh vanadium redox flow battery that is designed to optimise self-consumption in commercial and industrial PV systems.

VoltStorage

VoltStorage - Offering vanadium-redox flow battery based energy storage units. Raised a total funding of \$31.3M over 8 rounds from 14 investors. Founded by Felix Kiefl, Jakob Bitner and 1 other in the year 2014. VoltStorage has 15 competitors.

Company VoltStorage

The VoltStorage success story began in 2016 as a Munich-based startup with the vision of making clean and affordable energy accessible around the clock. Since then, we have been working continuously to give our customers the opportunity to take their energy supply into their own hands and drive the energy transition forward.

VoltStorage (EUR65M for low-cost, temperature-resistant iron flow ...

VoltStorage, a German energy storage startup founded in 2016, has developed vanadium redox flow battery technology for industrial and agricultural sectors to meet their energy requirements during periods of low wind and low sun. Meanwhile, the company develops a new cost-effective iron redox flow battery system with a 70% energy efficiency and

VoltStorage

100% erneuerbare Energien rund um die Uhr verfügbar machen, für eine fairere und sauberere Welt - das ist die große Herausforderung unserer Zeit. Bei VoltStorage entwickeln wir hierfür mit der Iron Salt Battery eine innovative und bahnbrechende Technologie und Lösung.
