### Battery storage

Professional storage as per SEWESO III and TRGS 510; Specially-equipped hazardous material warehouse also designed for highperformance lithium ion batteries; Storage concept for large-format lithium ion batteries; Use of safe and special work equipment, including the use of disaster containers; Flexible storage modalities according to your

### Lithium-ion battery risks in Warehousing and Distribution

A report produced by the Environmental Services

Association found that around 48% of waste fires in the UK each year are caused by li-ion batteries, with a cost to the UK economy of around £158 million. The growth in li-ion battery use also brings increased risks for the businesses that store and distribute battery-powered products.

### Standard of Care at Warehouses Storing Lithium-ion Batteries ...

Develop strict quality control procedures to identify, segregate and quarantine lithium batteries, products or packages, with the potential for an increased safety risk based on visible inspection and temperature

### Lithium Battery Storage: Avoid Risks and Hazards

In addition to warehouse-specific guidelines, lithium-ion batteries also need to be stored properly in other environments. Whether you're storing them at home, in a factory, or in a smaller facility, here are the essential tips to ...

### Lithium Battery Storage: Avoid Risks and Hazards

In addition to warehouse-specific guidelines, lithium-ion batteries also need to be stored properly in other environments. Whether you're storing them at home, in a factory, or in a smaller facility, here are the essential tips to keep your batteries safe and functional:

## How Do You Store Lithium Batteries in a Warehouse?

To store lithium batteries in a warehouse, keep them in a cool, dry environment with temperatures between 32°F and 77°F (0°C to 25°C). Ensure they are charged to about 40-60% capacity, and store them upright in a secure location away from direct sunlight and moisture.

## Shipping and Storing Lithium Batteries Safely and Compliantly

It is best to have an area exclusively for storing lithium batteries that is free from any materials that catch fire such as carpet, wood or chemicals. Batteries should be stored in non-flammable containers, such as concrete, metal or packaging designed specifically for storing lithium batteries, large enough that the batteries are not touching

## Safely Storing Lithium-Ion Batteries: Why Do You Need Specialist Storage?

Given these storage requirements, a specialist storage solution designed specifically for storing Li-ion batteries is going to provide your people with the best protection. What do these solutions look like and how should you choose the right ones for your operations?

## Contact BSB

BSB Warehouse, is the industry leader in discreet, state-of-the-art lithium-ion battery warehousing. Specialising in providing temperature-controlled storage for new, unused lithium-ion batteries within our warehouse facilities in the West Midlands. Connect with us
