Report: Renewable projects 'uphold occupation' in Western Sahara

Morocco's plans to generate 1000MW of renewable electricity in the Western Sahara upholds a partial occupation of the desert territory which is not recognised by the UN or any of its members,

Middle East Energy , Energy series Energy Storage in MENA

This report explores the importance of energy storage in overcoming the intermittency of renewable energy sources in the MENA region. It discusses current energy storage technologies, including pumped storage, battery energy storage systems (BESS), and ...

Morocco: Another renewable energy project in ...

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign ...

GE Vernova plans green hydrogen project in occupied Western Sahara

The project illustrates Morocco's increasing eagerness to develop the green hydrogen potential of the part of Western Sahara that it holds under illegal, military occupation since

1975. A study commissioned by the Moroccan government, published in the spring of 2023, showed that Morocco could most cost-effectively produce green hydrogen in the

Eleven countries sign on to BESS consortium at COP28

Renewable sources of energy with a combination of BESS are cheaper than fossil fuel power plants. As a multi-stakeholder partnership, the BESS consortium can bring the benefits of energy storage to low and middle-income countries.

Only three or four BESS suppliers can offer grid-forming product

Finnish marine and energy technology group Wärtsilä has been contracted by Australian utility Origin Energy to deliver the third stage of the Eraring battery energy storage system (BESS) in New South Wales.
