

# Wind energy solution France

## Overview

---

In 2021 France reached a total of 18,676 megawatts (MW) installed wind power capacity placing France at that time as the world's seventh largest wind power nation by installed capacity, behind the United Kingdom and Brazil and ahead of Canada and Italy. According to the IEA the yearly wind production was 20.2 TWh in.

- In 2001 the French government initially planned to produce 21% of its electricity consumption with in 2010 to comply with European directive of 27 September 2001. This means that France had.

Onshore Onshore wind power is projected to rise to 15,000 MW by 2018 and between a low target scenario of 21,800 MW and a high target scenario of 26,000 MW by 2023. Offshore Between 2004 and 2011.

Opinion surveys Public opinion of wind power developments has remained quite popular among the French public. A 2021 Harris Interactive survey shows that 76% of the French public have a positive view of wind power. This survey also.

The following offshore windfarm projects listed have been successful at the auctions. Floating turbine test sites France is operating a number of offshore test sites for prototype which.

• • • • •

Wind power was one of the leading electricity sources in France, with over 50 terawatt-hours generated in 2023, placing France among the most important wind power producers in the European Union.
