**DOE:90%**

Energy Earthshot Initiative "Long Duration Storage Shot",,,

### DOE's Energy Earthshots: Innovation Unlocks Big Cost and ...

Long Duration Storage Shot: Deployment in the electricity sector is dependent on realizing the Shot's cost targets as there is zero deployment under the Baseline scenario. ...

### Storage Innovations 2030

At the Summit, DOE will launch Storage Innovation 2030 to develop specific and quantifiable RD& D pathways to achieving the targets identified in the Long Duration Storage Energy Earthshot. Industry representatives are encouraged ...

### DOE taps 3 long-duration energy storage projects to receive \$15M

The U.S. Department of Energy on Monday announced three organizations will be awarded about \$5 million each to help advance long-duration energy storage projects.

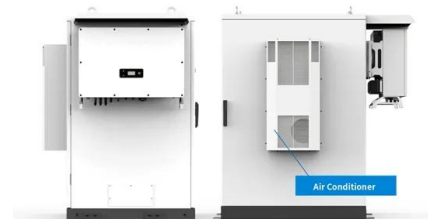

### US Department of Energy: Cost reduction target of

Taking inspiration from the DoE 'moonshot' programmes of several years ago that helped reduce the cost of solar PV to a level competitive with fossil fuels, the Long Duration Storage Shot and parallel Hydrogen Shot are the first two to have been launched so far from an expected six to eight Energy Earthshots the Department plans to start

### Long Duration Storage Shot: An Introduction

The Long Duration Storage Shot target is key to reaching President Biden's goal of net-zero carbon emissions from the electricity grid by 2035 and economy-wide by 2050. Developing the ...

### Long Duration Storage Shot

4 · The Long Duration Storage Shot -- which aims to reduce the cost of energy storage systems by 90% within the next decade -- ensures that a clean energy future is accessible and affordable for ALL Americans.

### Second DOE Earthshot to advance energy storage

The new energy storage Earthshot seeks to reduce the cost of grid-scale energy storage by 90% for systems that deliver 10+ hours of duration, also within the decade. The 90% reduction will be based on the baseline of the \$162/kWh cost for a ...

### Long Duration Storage Shot: An Introduction

The Long Duration Storage Shot target is key to reaching President Biden's goal of net-zero carbon emissions from the electricity grid by 2035 and economy-wide by 2050. Developing the technology and manufacturing to reach the Long Duration Storage Shot cost targets will also establish a new, U.S.-based manufacturing industry for storage products.

## Storage Innovations 2030

At the Summit, DOE will launch Storage Innovation 2030 to develop specific and quantifiable RD& D pathways to achieving the targets identified in the Long Duration Storage Energy Earthshot. Industry representatives are encouraged to register to present.

## Second DOE Earthshot to advance energy storage

The new energy storage Earthshot seeks to reduce the cost of grid-scale energy storage by 90% for systems that deliver 10+ hours of duration, also within the decade. The ...

## US Department of Energy: Cost reduction target of

Taking inspiration from the DoE 'moonshot' programmes of several years ago that helped reduce the cost of solar PV to a level competitive with fossil fuels, the Long ...

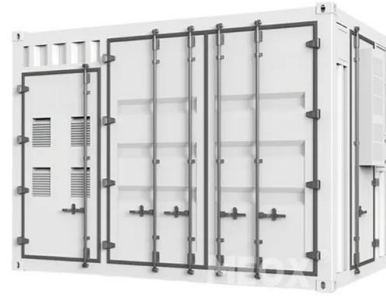

## DOE's Energy Earthshots: Innovation Unlocks Big Cost and ...

Long Duration Storage Shot: Deployment in the electricity sector is dependent on realizing the Shot's cost targets as there is zero deployment under the Baseline scenario. Innovation results in approximately 58 GW (2,000 GWh) of deployment by 2050, which avoids investment in short-duration battery storage and gas-fired resources.
