

# Zimbabwe best home solar panels

## Overview

---

A solar system has 3 major components. The solar panels that convert solar rays (sunlight) into electricity, batteries which store power for use when Zesa or the sun is not available, and the inverter which we know as being the one between the panels and the batteries performs duties that include charging the batteries.

Solar panels come in many different sizes in terms of the power each panel produces. The number of panels you put up depends on the power output of each panel, the capacity of your.

As stated in the intro we are looking at one type of battery which is the recommended battery for a 5KVA system. A 48V, 100Ah (4.8KWhr) lithium battery. In a well-designed solar system, no.

The brains to the whole thing. An inverter is an amazing invention that does quite a lot including: 1. Use the power from the panels and the electricity.
